F12 Home & Furniture

1- Prepare a table of Sales and Profit month-wise and product - wise in a working sheet

Solution 1- Here in sales and Profit column we will use two criteria, Month wise and product wise, So based on that 2- Will use Absolute reference for all the column, otherwise output will not get

3- Prepare the sales table region-wise and Product - wise in the working sheet

1- Here in sales column we will use two criteria, Region wise and product wise, So based on that 2- Will use Absolute reference for all the column, otherwise output will not get

4- Create a user control combo box for the product category

Note - 1- Inside this combo box, in cell link we will give reference of cell H9, this cell link will return the number of the selected combo box list item number to the cell H9. 2- Further this cell (H9) value will use in cell H10 by using OFFSET function and this will get the value from the list #10 - #13. 3- Now, this cell (H10) value we can use in the sales, profit table as the reference. 4- Sumifs function will use this value and return the same from sales Data table.
